

Dear Sir or Madame,

I'm writing to you in regard to a proposed ruling on the spectrum located between the frequencies of 3650 and 3700MHz. I support opening this frequency up for unlicensed use

I'd like to encourage you to:

- A. Support and facilitate mesh networking;
- B. Not obstruct or jeopardize, in any way, the primary function in this band of low-power transmissions at the community level;
- C. Not establish a first-in-time, first-in-right site licensing regime for high-power in a so-called "unlicensed" frequency (which would set a horrendous precedent for the future of unlicensed).

Thank you for your time and attention.

Best wishes,
